P92 IT Solutions
Nearshore Digital Solutions

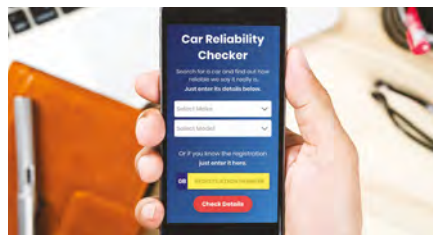

● We are an **enterprise website, mobile app and software development company** based in Budapest, Szeged and London with over 26 years of experience working for major corporations in the UK, Germany, North America and Eastern Europe.

About Us

Our focus is on mission critical enterprise web applications and mobile apps. We combine the right blend of on-client-site working and nearshore development service delivery. Our new purpose-built offices in Budapest and satellite offices in Szeged and London means we can attract the best people. Our training and conference centre at Pronay Castle is a significant facility to support staff development and retention.

Mobile App Development

We have been developing mobile websites for major brands since 2005 and native apps since 2010. We concentrate on creating an engaging user experience across multiple devices with a focus on consumer facing apps. We have developed apps for social gifting, taxi-hailing, car finance, logistics and health information exchange. Our key contribution to this field is to build robust infrastructures to support an integrated device approach with strong social network connectivity using the latest technologies such as Google Firebase and the MEAN Stack.

Enterprise Web Applications

Our goal has always been on delivering complex business applications in the key industry sectors of Motivation, Loyalty, Mobile, Media, Financial Services and Automotive. We have a rich toolset to apply to major client projects and a very thorough project delivery methodology. We use the SCRUM agile methodology to lower costs, minimise risks and to be able to adapt to fast changing project requirements.

Blue Chip Client Base and Strong Vertical Market Expertise

Among our 100 plus strong client list are such global giants as BMW, Sony Music, the Irish Post Office, Bertelsmann, RTL Group, British Telecom, Vodafone and Tesco. Others include Hungarian Gas Pipeline, Lagardère Group, WestLB, National Bank of Hungary and RAI Media. We have a range of customers in the reward, recognition, rewards and loyalty sectors including Blackhawk Network, CR Worldwide, Engage People, You-at-Work and Allegiant Loyalty.

Nearshore, Onshore and Onsite Development – A Blended Approach

We operate a hybrid model where we have staff in the field in North America, the DACH countries and in our UK office, where we offer local programme management, business analysis, solution architecture and UX/UI design. Most development is undertaken at our Nearshore location in Budapest and Szeged in Hungary. We offer an excellent option for clients wanting to add flexible resources whilst at the same time retaining knowledge in the clients' product engineering.

Low Staff Turnover – High Know-How Retained

Employing over 120 highly skilled designers, analysts, developers, architects, testers, project managers and support staff – all enthusiastic individuals that make us one of the best companies to work for. We have one of the highest staff retention rates of any IT company locally – which means customer project know-how is retained.

Our Training and Conference Centre - Pronay Castle

We own and operate one of Hungary's leading 40 room hotel and conference centres at Pronay Castle in Alsopeteny just outside Budapest. This is used for staff induction, training and team-building days. The castle has been lovingly restored, with many original features such as a working seventeenth century wine cellar, stocked with wines grown at the P92 Group winery on the banks of stunning Lake Balaton.
